ABSTRACT

This document, published annually, reports general information as well as detailed data concerning both the public and the private segments of the higher education system of Florida. Various tables provide breakdowns of total, graduate, and first-time-in-college enrollment by State and county for each of the four types of schools (public universities, public community and junior colleges, private universities, and private colleges). Chapter I represents an attempt to familiarize the reader with the institutions from which data were gathered and with abbreviations utilized throughout the ensuing chapters. The remaining chapters deal with statewide college level enrollment. Chapter II provides an overall picture of enrollment in the State of Florida, while Chapter III deals primarily with enrollment by individual institution. First-time-in-college enrollment receives attention in Chapter IV. Chapter V contains an in-depth look at graduate enrollment. Black and nonblack enrollment figures and percentages comprise the tables of Chapter VI. Recent trends and developments highlight the final chapter. (Author/PG)

Preface

Annual reports of enrollment in the colleges and universities of Florida have been published by the Office of the Board of Regents since 1958. This report of the enrollment for the fall of 1972 is the sixteenth volume in an unbroken series of reports.

Now that enrollment in colleges and universities in Florida appears to be stabilizing, the report series reflects the high-water mark in the opening of new institutions and the enrollment gains that accompanied the addition of new institutions to Florida's array of colleges and universities, public and private alike.

This report contains information of enrollment by race (black and non-black students). The racial components of enrollment were obtained from compliance reports submitted by institutions of higher learning to the Office of Health, Education, and Welfare required by the Civil Rights Act of 1964. Only the compliance reports from public institutions were available and the section of enrollment by race (Chapter VI) is limited to the state universities and community colleges.

I wish to thank the presidents and the registrars of the more than sixty institutions of higher learning in Florida for providing this office with enrollment data for the report.

This volume represents the work of three persons in the Department of Education: Lloyd Lauffer, Division of Community Colleges, and Jerry Baker and G. Emerson Tully, both of the Office of Academic Affairs, Division of Universities. The typist for the final manuscript and the several drafts that preceded the final copy was Carole Mullins.

Allan Tucker

CHAPTER I

GENERAL INFORMATION

CHAPTER I

GENERAL INFORMATION

Enrollment in Florida's Institutions of Higher Learning is an annual publication of the Office of the Florida Board of Regents. The report includes general information as well as detailed data concerning both the public and the private segments of the higher education system of Florida. Various tables exhibited in this document provide breakdowns of total, graduate, and first-time-in-college enrollment by state and county for each of the four types of schools, the public universities, the public community and junior colleges, the private universities, and the private junior colleges.

Chapter I represents an attempt to familiarize the reader with the institutions from which data were gathered and with abbreviations utilized throughout the ensuing chapters. The first section of Chapter I summarizes the changes necessary to update the current edition of the enrollment report. After a complete alphabetical listing, including location, of each institution by degree type, two maps follow The first identifies the public and private universities, and the second positions the public and private community and junior colleges. This further details the location of the sixty-two reporting schools. Chapter I is concluded with an enumeration of abbreviations, which the reader will encounter repeatedly as he uses this publication.

The remaining chapters deal with state-wide college-level enrollment. Chapter II provides an overall picture of enrollment in the State of Florida,

while Chapter III deals primarily with enrollment by individual institution. First-time-in-college enrollment receives attention in Chapter IV. Chapter V contains an in-depth look at graduate enrollment. Black and non-black enrollment figures and percentages comprise the tables of Chapter VI. Recent trends and developments highlight the final chapter, Chapter VII.

CHANGES, ADDITIONS, AND DELETIONS

Many noteworthy changes in the lineup of institutions of higher learning in Florida have occurred since the production of the Fall, 1971 enrollment report. Two new State University System (SUS) institutions opened for classes in September of 1972: Florida International University, Miami, and the University of North Florida, Jacksonville. Both institutions are upper-division universities, in that instruction begins at the junior class level. Also, the initial class of a new public community college, Pasco-Hernando Community College, Dade City, convened last September. Jones College, Orlando, has switched from a private junior college to a private baccalaureate degree-granting institution (PBDGI). A private junior college, St. Joseph College of Florida, located at Jensen Beach, closed following the 1971-72 school year. One public two-year institution, Edison Junior College of Fort Myers, changed its name to Edison Community College, making a total of 15 of Florida's 28 public two-year schools using the designation "community college." Finally, two private baccalaureate degree granting schools, Eckerd College of St. Petersburg, formerly known as Florida Presbyterian College, and Embry-Riddle Aeronautical University of Daytona Beach, formerly titled Embry-Riddle Aeronautical Institute, have acquired their new names within the last year.

Also, this year a new chapter has been inserted into the enrollment report. Chapter VI now consists of a report on black and non-black enrollment in the public sector of the institutions of higher learning in Florida. Recent trends and developments in higher educational enrollment

in Florida, which formerly appeared in Chapter VI, now are discussed in Chapter VII.

CHAPTER II

REPORT OF STATEWIDE ENROLLMENT

CHAPTER II

REPORT OF STATEWIDE ENROLLMENT

On-campus enrollment in colleges and universities throughout Florida is reported in this chapter. Off-campus enrollment information is not reflected in the tables of this document, with one exception; the tables in Chapter VI showing enrollment by race include off-campus enrollments.

As seen below, the enrollment growth rate has continued to slacken. The combined sectors, public and private, showed a 4.3 per cent rate of growth, down 3.2 per cent from a year ago. A growth rate of 6 per cent was the lowest the public sector has experienced in at least the last eight years. Moreover, the rate of decline in enrollment in the private sector was even greater this year than a year ago. The obvious result was the lowest rate of growth for the combined sectors in the last eight years, as shown by the tabulation below:

	Public Sector	Private Sector	Combined Sectors
	(Annual Percentage Change)		
Fall, 1965 over Fall, 1964	21.1	9.3	17.5
Fall, 1966 over Fall, 1965	14.6	3.4	13.5
Fall, 1967 over Fall, 1966	13.2	7.0	10.3
Fall, 1968 over Fall, 1967	13.2	9.2	12.2
Fall, 1969 over Fall, 1968	11.4	3.6	9.7
Fall, 1970 over Fall, 1969	8.4	2.1	7.1
Fall, 1971 over Fall, 1970	9.5	-0.3	7.5
Fall, 1972 over Fall, 1971	6.0	-3.6	4.3

Three mutually exclusive categories, first-time-in-college, previously enrolled undergraduate, and graduate students, partition the enrollment figures appearing in Table 1, page 16. Summation over either marginal column yields a grand total on-campus headcount enrollment of 254,112. Undergraduate types of programs highlight Table 2.

Tables 3, 4, and 5 report enrollment of Florida and non-Florida residents. In Table 3, students are classified solely on the basis of Florida or non-Florida residency. Table 4, proceeding one step further, displays Florida and non-Florida enrollment by undergraduate and graduate levels. In a slightly more sophisticated approach, Table 5 shows not only both Florida and non-Florida students, but also the number and the percentage of students enrolled in each of the four types of institutions.

In the next two tables, enrollment is sorted according to geographic areas. Total enrollment by state (Table 6) precedes Florida enrollment by county (Table 7).

Tables 8 through 12 deal with enrollment percentages dating back to 1957. Table 8 offers total enrollment by type of institution. Table 9 presents the percentage of Florida enrollment by type of institution for each of the 16 years, whereas Table 10 complements Table 9 with the percentage of non-Florida enrollment by type of institution for each year. Table 11 includes Florida enrollment as a per cent of total on-campus enrollment for each type of institution. Table 12 has the same type of information for non-Florida students.

Tables 13 and 14 take a look at enrollment by sex. Since 1967, male enrollment, expressed as a percentage of total enrollment, has declined by 2.4 per cent from 60.5 per cent to 58.1 per cent (Table 13). Nevertheless, a great deal of disparity, especially in the private sector, still exists between male and female enrollment. Table 14 offers a more detailed account of current male-female enrollment data. As can be seen, male FTIC

enrollment percentages lagged behind male total enrollment per cents, but remained larger than female FTIC per cents.

TABLE 1

ENROLLMENT IN FLORIDA'S INSTITUTIONS OF HIGHER LEARNING
FALL 1972

CHAPTER III

ENROLLMENT BY INSTITUTIONS

CHAPTER III

ENROLLMENT BY INSTITUTIONS

Individual institution enrollment and institutional enrollment characteristics are the subjects of the tables contained in Chapter III. Miami-Dade Junior College heads the list, sorted according to total on-campus enrollment, of institutions which recorded more than 2,500 on-campus students (Table 15). This year marked the seventh consecutive year that Miami-Dade Junior College has enrolled more students than any other Florida institution of higher learning. The only addition to the list this year was Florida International University, which opened for classes initially in the Fall, 1972. Last year's rank appears in parenthesis to the right of the name of each school. Table 16 ranks the nine state universities, the 28 public community and junior colleges, the 22 private baccalaureate degree-granting institutions, and the three private junior colleges by size of enrollment.

Tables 17, 18, and 19 offer another look at male-female enrollment. Table 17 reports both male and female enrollment for total, FTIC and terminal program enrollment for each school. Terminal enrollment means a college-grade enrollment in a terminal or technical program consisting of curriculums of at least one year but fewer than four years. On-campus, FTIC, and terminal program enrollment by sex account for a portion of the categorization of Tables 18 and 19. A further division of these groups by type of institution produces the remaining sub-classification of students for the two tables. Table 19 provides the percentages corresponding to the numbers appearing in Table 18.

Table 20 associates each institution with its Florida, other states, other countries, total, and percentage of non-Florida enrollment. Once again this year, [illegible] College, a PBDGI, had a larger percentage (90.4 per cent) of non-Florida students than any other school in the state. Conversely, the school with the smallest percentage (0.6 per cent) of non-Florida students was also a PBDGI, Jones College at Orlando.

Alternate year enrollment, contained in Table 21, indicates recent enrollment trends at every reporting institution. Florida on-campus enrollment by county for the individual SUS schools (Table 23) follows SUS enrollment data by state (Table 22). A brief historical glance at Florida and non-Florida enrollment for the SUS institutions appears in Table 24 and Table 25. SUS enrollment figures for the past nine years and the percentages which correspond to those numbers form the data for Tables 26 and 27, the concluding tables of Chapter III.

CHAPTER IV

FIRST-TIME-IN-COLLEGE ENROLLMENT

CHAPTER IV

FIRST-TIME-IN-COLLEGE ENROLLMENT

A first-time-in-college (FTIC) student is an on-campus student who initially enrolls at an institution of higher learning in courses for college credit and has never been previously enrolled in any kind of college or university. A student is counted only once as an FTIC enrollee. Subsequent enrollment by the student in any institution of higher learning does not constitute a FTIC enrollment.

Tables 28 through 31 contain an extensive examination of geographic breakdowns of current FTIC enrollment. FTIC data by state for each type of institution make up the first table, Table 28, of Chapter IV. Moreover, Table 29 furnishes the same kind of information for the separate SUS institutions. With the exception of Florida, New York, with 1,614 FTIC enrollees, accounted for more FTIC student in Florida than any other state (Table 28). Not surprisingly the University of Florida, with a FTIC registration of 2,709, listed more FTIC students than any other SUS school (Table 29). Table 30 has FTIC information by county for each class of instruction, whereas the county data for the individual SUS schools fills Table 31.

Tables 32 through 34 chronicle some of the recent history of FTIC enrollment in Florida. Table 32 reviews total FTIC enrollment percentages dating back to 1958, while Table 33, covering the same time period, concerns itself with Florida FTIC registration per cents. Accordingly historical non-Florida FTIC data, appearing in percentage form, follow in Table 34. Adhering to the existing trend, the public sector, particularly the public community and junior colleges, continued to enroll a larger and

larger percentage of the total FTIC enrollment (Table 32). A closer inspection shows that the Florida students were the primary contributors to this flow toward the public sector (Table 33), while non-Florida FTIC students maintained a tendency towards the private baccalaureate degree-granting schools (Table 34).

Past and present FTIC enrollment figures by geographic area comprise Tables 35 and 36. Table 35, which has FTIC data by state, precedes Florida FTIC county totals found in Table 36. Table 35 indicates a substantial FTIC registration increase of 4,831 students this year over last year. This occurred after a net decrease of 894 students last year over the year before. Florida FTIC enrollment alone increased 3,620 or 7.5 per cent over the 1971 figure of 47,959, which represented only a 0.5 per cent increase over 1970 Florida FTIC enrollment. Chapter IV ends with Table 37 which shows FTIC enrollment by institution in alternate years. An examination of Table 37 reveals that Miami-Dade Junior College enrolls 3,674 more FTIC students than any other school in the state.

*Jones College shifted from PBDGI to Private JC in 1967.

**Prior to 1971, Jones College, Jacksonville was a two year institution and prior to 1972, Jones College, Orlando was a two year institution.

***St. Joseph College shifted from PBDGI to Private JC in 1970 and closed after the 1971-72 school year.

#Webber College shifted from PBDGI to Private JC in 1970.

##The College of Orlando closed after the 1970-71 school year.

CHAPTER V

GRADUATE STUDENT ENROLLMENT

CHAPTER V

GRADUATE STUDENT ENROLLMENT

A graduate student is an on-campus student who has enrolled in at least one graduate level course for college credit after earning a baccalaureate or higher degree.

Table 38 includes SUS versus PBDGI graduate enrollment as well as total graduate enrollment for each state. Table 39 yields the same comparisons for Florida graduate students by county. Table 38 indicates that a total of 19,137 students enrolled in graduate school in Florida this year; moreover, SUS institutions accounted for over 75 per cent of these students. More than 76 per cent of the Florida residents who registered for graduate school in Florida in 1972 attended SUS schools (Table 39).

Not only did total graduate enrollment (Florida and non-Florida students) decline this year for the first time in recent years (Table 40), but 1972 Florida graduate enrollment also was down by 107 students from last year. Table 42 shows that the University of Florida registered 1,067 more graduate students than any other school in Florida. Among graduate students, the percentage in the State University System as opposed to the private sector, after remaining fairly constant for some years, has suddenly expanded and in 1972 encompassed 76.1 per cent of the total number of post-baccalaureate students. Finally, the number of graduate students expressed as a per cent of total college level enrollment in Florida has fallen for the third consecutive year and currently stands at 7.5 per cent.

CHAPTER VI

BLACK AND NON-BLACK ENROLLMENT

CHAPTER VI

BLACK AND NON-BLACK ENROLLMENT

The data utilized in this chapter were obtained from the "Compliance Report of Institutions of Higher Education Under Title VI of the Civil Rights Act of 1964, Fall 1972." The discrepancies that exist between some of the enrollment figures found in this chapter and the totals reported in other chapters may have been the result of any one or a combination of the following factors. The tables of this chapter include both on-campus and off-campus enrollment while the tables presented in the other chapters report only on-campus enrollment. The compliance report and the enrollment report may have been tabulated at two different points in time. Therefore, due to late registrations and dropouts different enrollment totals developed. Individual institutions may have had differing interpretations of which students to include in each report. Once again the result would have been unequal enrollment totals on two separate enrollment reports from the same institution.

Black and non-black enrollment totals and percentages for the public higher educational institutions in Florida comprise both of the tables of Chapter VI. Table 43 indicates that of the state universities, with the exception of predominately black Florida A & M University (96.8 per cent black with 4,417 black students), the University of North Florida had the highest percentage of black students (7.3 per cent), whereas Florida State University had the highest black enrollment (935 students). On the other hand, Florida Technological University enrolled both the smallest percentage of blacks (2.0 per cent) and the smallest number of blacks (136 students) of any of the SUS institutions.

Table 44 reveals that of all of the public community and junior colleges, North Florida Junior College had the highest percentage of black students (16.3 per cent), while Miami-Dade Junior College had the most black students (3,214 registrants).

On a systemwide basis, the SUS institutions with 8.5 per cent of their total enrollment consisting of black students (Table 43), enrolled 0.8 per cent less blacks than the public two-year schools, which had a black enrollment of 9.3 per cent of their total student population (Table 44).

CHAPTER VII

TRENDS AND NEW DEVELOPMENTS IN FLORIDA HIGHER EDUCATION

CHAPTER VII

TRENDS AND NEW DEVELOPMENTS IN FLORIDA HIGHER EDUCATION

Twenty public and private institutions, with a total enrollment of 50,286 students, participated in the statewide survey leading to the first issue, published in the autumn of 1958, of Enrollment in Florida's Institutions of Higher Learning. Since that initial study the number of reporting institutions has grown to 62 (a 210 per cent increase) and the number of students has risen to 254,112 (a 405 per cent increase). Consistently enrolling an increasing proportion of college level students, the public institutions have raised their percentage of total enrollment from 57.1 per cent in 1957 to 82.9 per cent of the on-campus enrollment this year. After peaking at 60.5 per cent in 1966, male enrollment percentage has ebbed slightly to 58.1 per cent of the total on-campus college level population (Table 13). Although total on-campus enrollment continued to grow, the rate of growth has steadily subsided. The growth rate of the combined public and private sectors has now dropped below 5 per cent (Table 46).

STATE UNIVERSITY SYSTEM

This year the two newest SUS schools, Florida International University and the University of North Florida accepted their opening upper-division classes. That brings the total number of SUS schools to nine.

Table 8 indicates that, after undergoing a period of regression throughout the decade preceding 1967, the State University System then started once again to expand its share of the total on-campus enrollment.

Enrolling over 10,000 more students this year than last, the SUS schools seemed to be maintaining a solid pattern of growth (Table 26); however, the two new SUS universities accounted for nearly 70 per cent (7,177 students of the 10,317 enrollment increase) of the additional students.

PUBLIC COMMUNITY/JUNIOR COLLEGES

This year Pasco-Hernando Community College makes its first appearance in the enrollment report. Nevertheless, after fourteen consecutive years of growth, the public two-year colleges' share of the total enrollment receded by 1.3 per cent in 1972 to 48 per cent of the total on-campus enrollment (Table 8). A look at Table 12 indicates that a fall-off in non-Florida enrollment was a major reason for this decline in proportion of total enrollment. In keeping with an apparent statewide trend toward a decreasing percentage of male enrollment, the public community and junior colleges showed an increase in female enrollment of two per cent last year (Table 13). Total enrollment in the public two-year colleges was 121,827 students for an increase of 1,678 students (1.4 per cent) over a year ago (Table 46).

PRIVATE BACCALAUREATE DEGREE GRANTING INSTITUTIONS

This year the list of private baccalaureate degree granting institutions once again contains the name of Jones College, Orlando, which functioned last year as a private junior college. Despite the additional school, the private degree granting schools dropped to 16.7 per cent (a one per cent loss) of the total on-campus enrollment (Table 8). The percentage of non-Florida students

continued to advance not only because of the increasing influx of non-Florida PBDGI students (Table 12), but also because the number of Florida PBDGI students has leveled off (Table 11). In contrast with the public sectors of higher education, in the PBDGI the proportion of males in the enrollment rose 0.6 per cent (Table 13). For the first time in at least the last fourteen years, there was a net decrease of 1.3 per cent in PBDGI enrollment, from 43,165 students in 1971 to 42,592 students last year (Table 46). Of the twenty private baccalaureate degree granting institutions reporting as four-year institutions in 1970, eight have declined in enrollment over the past two years and twelve have reported enrollment increases (Table 21).

PRIVATE JUNIOR COLLEGES

Two changes in the ranks of the private junior colleges have occurred since last year. St. Joseph College, having closed after completion of the 1971-72 school year, has been deleted from the current list of active higher educational institutions. Jones College, Orlando, has returned to baccalaureate degree granting status.

After trending downward for the last 13 years, private junior college enrollment expressed as a percentage of total on-campus enrollment in each type of institution has dipped to 0.4 per cent of the total on-campus enrollment (Table 8). A smaller number of out-of-state students willing and able to attend private junior colleges in Florida accounted, at least partially, for this fall-off in enrollment (Table 12). Over the last two years the private junior colleges have shown the largest increase, 25.6 per cent, in proportion of female to male enrollment of any of the four types of institutions (Table 13).

On the other hand, total enrollment, falling nearly 52 per cent this year after a 52 per cent drop last year, continued to plummet (Table 46). The transition of many schools both to and away from junior college status combined with the relatively small total number of students enrolled in the private two-year schools have to a great degree caused the large year-to-year fluctuations in on-campus enrollment in the private junior colleges. St. Joseph College, after switching from a PBDGI to a private junior college in 1967, closed after the 1971-72 school year. In 1963, Jones College opened as a private baccalaureate degree granting school. In 1967, Jones College shifted from a PBDGI to a private junior college; then, in 1971 Jones College, Jacksonville branch, followed in 1972 by Jones College, Orlando branch, returned to a baccalaureate degree issuing level. Prior to 1970, Webber College was a private school awarding the baccalaureate degree, but in 1970 Webber College became a private junior college. Moreover, the College of Orlando ceased operation after completion of the 1970-71 school year.

FIRST-TIME-IN-COLLEGE ENROLLMENT

FTIC enrollment constituted over 24 per cent of total on-campus enrollment in Florida this year (Table 1). As evidenced in Table 32, the public community and junior colleges have expanded their share of FTIC enrollment to such an extent that they now enroll 70 per cent of all FTIC students. Tables 33 and 34 indicate that over the last fifteen years, while they have made proportionally large gains in both Florida and non-Florida enrollment, the public two-year schools very definitely attract more

students residing in Florida than out-of-state FTIC students, who still prefer the private baccalaureate degree granting schools. Although in 1971 there was a 1.5 per cent drop in FTIC enrollment (Table 35), this year FTIC enrollment jumped by 8.4 per cent (4,831 students). A further inspection of Table 35 reveals that 75 per cent of the increase this year (3,622 of 4,831 students) was attributable to a higher enrollment of Florida FTIC students.

GRADUATE ENROLLMENT

Approximately 7.5 per cent of the 254,112 students recorded in the 1972 enrollment report were classified as graduate students (Table 1). For the third year in succession the proportion of graduate students in the general student population declined (Table 42). With an enrollment of 5,090 students, the University of Florida had the largest graduate school in the state, while of the SUS schools, Florida State University not only had the largest percentage of non-Florida students enrolled, but also had the larges number of non-Florida students (Table 4). Coincidentally, both the State University System and the private baccalaureate degree awarding institutions had an identical non-Florida graduate-student enrollment of 19.8 per cent.

Although graduate enrollment grew quite rapidly in the last half of the decade of the 1960's, graduate registration has clearly leveled off in the early 1970's (Table 40). In fact, graduate enrollment even receded by 638 students this year to 19,137 (Table 42). Enrollment of Florida residents in graduate schools throughout the state has accurately mirrored this same trend of development (Table 40).

NON-FLORIDA ENROLLMENT

A student who reports his permanent residency at the time of his application to a higher educational institution in Florida as being outside of the state of Florida is defined to be a non-Florida enrollee. Non-Florida enrollment in Florida for the Fall, 1972 was 14.4 per cent of the total student population (Table 3). This year a greater percentage (19.8 per cent to 14.0 per cent) of graduate than undergraduate students came from outside of Florida (Table 4). Only about 8.0 per cent of the students in the public sector were non-Florida students; whereas over 45 per cent of the enrollment in the private sector were composed of non-Florida students (Table 5). The private junior colleges with a non-Florida enrollment of nearly 72 per cent leaned very heavily toward a high registration of non-Florida students; however, only 5.9 per cent of the students in the public two-year institutions were classified as non-Florida residents (Table 12). Even though total non-Florida enrollment has nearly quadrupled since 1957, out-of-state enrollment nevertheless comprised a smaller proportion of the total student population in 1972 than in 1957 (14.4 per cent in 1972 to 18.8 per cent in 1957).

*Jones College shifted from private degree-granting to a private junior college in 1967, but the Jacksonville branch returned to PBDGI status in 1971, while the Orlando branch reverted to PBDGI status in 1972. St. Joseph College and Weber College shifted from private degree-granting to private junior colleges in 1970, then St. Joseph College closed in 1972. The 1964 private junior college total includes 34 Florida Military College students not reported elsewhere in this text.
